

Dear friends,

We are a non-profit charitable organization "Charitable Fund for the Assistance and Rehabilitation of Diabetes Patients", founded on 23.07.2015 and helping people diagnosed with diabetes for 8 years , and saving thousands of young and adult lives throughout the country.

At the moment, for the majority of diabetics in Ukraine, it is no longer about lifestyle, but about survival as such.

We pay special attention to the critical situation of young children diagnosed with diabetes who remain under our care. The life of a child with a diagnosis of diabetes, like an adult, directly depends on whether she will have a device and consumables today, thanks to which it is possible to control her sugar level. **This is our special mission and where we direct aid in the first place.**

We provide thousands of people, children and the elderly with vital devices for diabetes control!

These are glucometers and test strips, insulin pumps and the necessary consumables for them.

Our first and foremost need is blood glucose monitoring, it's like air for a child and their family. Unfortunately, in our country, it is not possible to buy this vital device for a disability pension of €40!

In addition, we provide assistance in the form of vitamins, medicines and help ensure proper nutrition for people with this difficult diagnosis. One of our main goals is to open a rehabilitation center in Slovakia. More detailed information about us and our activities is available on our website, as well as on Instagram, Facebook, and in our Viber and Telegram groups.

We will be incredibly grateful for any support:

- glucometers and test strips,
- consumables for pumps,
- sensors and blood sugar monitoring systems,
- medicines, etc.

A low bow for your help and for everything you do for Ukraine and the Ukrainian people. We undertake to sign the relevant agreement on the provision of charitable assistance, to deliver the transfer of assistance in accordance with such an agreement to end users and to use this assistance exclusively within the scope of the activities of our Charitable Fund.

We also undertake not to transfer or in any way alienate the sensors and other dia goods provided to us as part of charitable assistance to third parties, and to provide photo reports along with words of thanks from end consumers.

Sincerely,

Eduard Piskunov

founder and chairman of the board of the Foundation
